

Job Vacancy Clinical Embryologist/Trainee Embryologist

Hours of work:	40 hours per week
Salary:	Refer to application pack
Permanent/temporary position:	Permanent
Duties:	The embryologist role involves all aspects of work in both the embryology and semenology laboratories: semen analyses and preparation for treatment, oocyte assessment and insemination, embryo culture, grading and cryopreservation. Ability to perform ICSI, laser assisted hatching and vitrification desirable.
Qualifications/registration required:	Candidates will have a degree in Life Science (2.i.) and possess the ACE Certificate and be state registered with the Health Professions Council (HPC) however, applications from trainee embryologists who are yet to be registered will also be considered.
Experience required:	Candidates will have clinical experience, possess excellent communication and interpersonal skills, whilst demonstrating an ability to work with exceptional accuracy and attention to detail. They should have an understanding of the emotional impact fertility treatment has on patients and be motivated to deliver high quality care in a professional and empathic manner.
Closing date:	31 October 2011
