

**List of Charges**

Prices for investigations, treatments or preservation services do not include the cost of fertility drugs, the electronic witnessing charge, or any HFEA levy. For an estimate of the total cost of any services, refer to the MFS Cost Estimator<sup>®</sup> in the Fees section of [midlandfertility.com](http://midlandfertility.com).

⊛ includes freezing of embryos<sup>1</sup>, eggs<sup>2</sup> or sperm<sup>3</sup> and one year's storage charge

Fertility Assessment	Initial consultation (payable in advance)	£175
	Treatment assessment	£290
	Treatment assessment (if paid at initial consultation)	£255
	Repeat/further consultation (payable in advance)	£175
	Repeat screening: - female - male	£150 £120
Treatments	Follicle tracking (per cycle)	£475
	Clomid challenge (per cycle and non-refundable unless converting to IVF/ICSI)	£400
	IUI	£850
	IVF ⊛ <sup>1</sup>	£2,820
	ICSI ⊛ <sup>1</sup>	£3,330
	Elective egg freezing preparation service	£460
	Egg retrieval and egg freezing ⊛ <sup>2</sup>	£2,800
	Egg thaw, insemination and embryo transfer	£1,640
	Egg retrieval using IVF and embryo freezing ⊛ <sup>1</sup>	£2,800
	Egg retrieval using ICSI and embryo freezing ⊛ <sup>1</sup>	£3,310
Frozen embryo transfer	£1,065	
Donor Treatments	♦ the donor is responsible for the cost of any drugs over and above the standard package	
	Egg recipient administration fee (payable on registration of recipient details and non-refundable)	£510
	Known egg donor screening (payable by recipient)	£565
	Receiving donated eggs with IVF ⊛ <sup>1</sup> (includes cost for standard package of donor drugs)	£5,485
	Receiving donated eggs with ICSI ⊛ <sup>1</sup> (includes cost for standard package of donor drugs)	£5,995
	Egg sharing with IVF ⊛ <sup>1</sup> (recipient bears cost of standard package of donor drugs) ♦	£950
	Egg sharing with ICSI ⊛ <sup>1</sup> (recipient bears cost of standard package of donor drugs) ♦	£1,460
	Receiving donated embryos	£2,900
	One vial of donor sperm for use in IUI/IVF/ICSI cycle, approximately	£280
	Bulk purchase of sperm, requires: - donor pregnancy allocation - per vial of sperm (minimum purchase 8 vials)	£1,000 £230
Surrogacy	Surrogate screening	£700
	Host surrogacy with IVF ⊛ <sup>1</sup>	£5,375
	Host surrogacy with ICSI ⊛ <sup>1</sup>	£5,885
Male Factor Procedures	Host surrogacy with frozen embryos	£2,200
	Male hormone profiling	£195
	Surgical sperm recovery	£1,250
	Vasectomy reversal back-up plan	£1,450
Other Procedures, Assessments and Diagnostic Tests	Private sperm analysis	£295
	(† chargeable if an additional requirement to any standard treatment package)	
	Ovarian reserve test	£300
	Fertility investigation package	£1,000
	Tubal patency testing	£335
	Cyst aspiration†	£350
	Saline scan†	£225
	Ultrasound scan† (if additional to those included in treatment package)	£135
	Recurrent miscarriage monitoring	POA
	Genetic screening: - Cystic Fibrosis - Cystic Fibrosis and karyotype - Cystic Fibrosis, karyotype and Y deletion	£155 £280 £400
Administration Costs	Administration fee for the overseas export/import of gametes/embryos (courier costs charged in addition)	£140
	Administration fee for the transfer of gametes/embryos within the UK	£90
	Receipt, storage and administration of patient drugs at MFS	£50
	Electronic witnessing system: (non-refundable) - major cycle - minor cycle	£40 £20
Freezing/Storage	Annual storage of embryos, eggs, sperm and sibling sperm (cost applies only to year 2 and beyond for treatments which include ⊛)	£170
	Freezing and storing sperm ⊛ <sup>3</sup> / testicular tissue ⊛ <sup>3</sup>	£410
HFEA Levies	- for the creation in vitro, or transfer, of embryos	£75
	- for the use of donor sperm	£37.50

## Cancellation Policy

When a cycle of treatment is cancelled for any reason the patient will be liable for any costs incurred before cancellation. For example, if a standard IVF cycle is cancelled after down regulation plus one monitoring scan, the costs incurred before cancellation would be £285 for the treatment planning appointment plus £135 for a scan. A credit note will be issued for the difference between the original treatment cost, minus the costs incurred. Any credit balance can be used against future treatment costs or a cheque refund can be requested.

No refund is given for unused medications. MFS is not legally able to take back medication from patients once the drugs have left the clinic. Left-over medications should be stored appropriately by the patient and may be used for future treatment cycles. It is the patient's responsibility to advise the clinical staff if they have medications left over from previous cycles that may be used for a future cycle.

Items highlighted as so represent the consumable costs incurred up to the point of cancellation. A credit note will be raised for the original treatment cost minus this amount

Items highlighted as so represent the amount to be credited to a patient's account at this point of cancellation

Cycle cancelled at:	IVF	ICSI	Egg share donor IVF	Egg share donor ICSI
Treatment planning appointment	£285	£285	£285	£285
Subsequent monitoring scans (per scan)	£135	£135	£135	£135
No eggs collected	£425	£935	£125	£635
Embryo transfer cancelled (not including elective freeze all)	£285	£285	£82	£82
<b>Miscellaneous Costs:</b>				
Monitoring scans for frozen embryo transfer/IUI	£135 per scan			

**Elective freeze all.** If, before embryo transfer, the clinical team recommends that all embryos are frozen for use in a future cycle, there is no charge for the first attempt to transfer frozen embryos, other than for any drugs required. Subsequent frozen embryo transfers, even if the first has resulted in a cancellation, are fully chargeable.

**Egg share recipients, surrogacy, egg freezing or embryo freezing.** If a cycle of treatment is cancelled for egg share recipients, or patients undergoing surrogacy, or egg/embryo freezing, the circumstances will be assessed on an individual basis and any credit given.

### Further Information

Any questions about the cost of treatment or finance arrangements should be addressed to Gail Bellingham, finance manager via [gail.bellingham@midlandfertility.com](mailto:gail.bellingham@midlandfertility.com) or Becky Cooves, patient liaison finance officer, via [becky.cooves@midlandfertility.com](mailto:becky.cooves@midlandfertility.com) or via 01922 455911.

## Costs: Important Information

This information should be read with the Midland Fertility Services Terms and Conditions. MFS operates an open and transparent fee structure. Published costs in the List of Charges include all of the usual stages of treatment, from the planning appointment through to pregnancy scan or treatment follow-up.

These costs do not include any medication required throughout the treatment as each patient requires a different prescription. MFS reserves the right to alter the fees at any time. Usually fees are reviewed annually with effect from 1 April. Where possible, MFS will give one month's notice of any changes.

### Treatment and drugs

Patients are responsible for paying fees in full at least 14 days before the start of any planned cycle to ensure enough time for the required medication to be ordered and delivered. In addition:

- drugs ordered by MFS from the pharmaceutical company totalling less than £150 per patient incur a processing charge of £15
- storage of patient drugs at MFS incurs a charge of £50
- the clinical team prescribe a standard dose of medication for treatment, to try to minimise waste. It may be necessary to 'top-up' this dose with additional medication and the patient will incur these additional costs
- the cost of any 'top-up' drugs issued from MFS stock is to be paid on the day they are prescribed
- no refund may be given to unused drugs which have been removed from MFS
- any unpaid costs will result in treatment being delayed. MFS reserves the right to cancel appointments or refuse treatment at short notice if fees are not paid before that appointment
- invoices for male procedures should be settled in full 14 days before the treatment date

### Additional costs

- HFEA levies are beyond the control of MFS and may be subject to change. An additional HFEA levy is applicable to all IVF, ICSI and frozen embryo transfer cycles and on IUI cycles using donor sperm. The current HFEA levies are listed in the List of Charges
- any additional procedures and/or investigations required at any point during treatment will be discussed with the patient before being carried out and further charges may apply. Please contact a member of the finance team before proceeding to confirm or clarify any such charges
- electronic witnessing is a rigorous laboratory procedure to effectively identify and track patients' gametes and embryos. 'Major' treatment cycles (eg IVF and ICSI cycles) incur an electronic witnessing cost of £40 and 'minor' treatment cycles (eg IUI and frozen embryo transfers) incur a cost of £20. The electronic witnessing charge is applied to all new treatment cycles and is non-refundable
- the first year's storage of frozen gametes and embryos is included in the original treatment cost (as indicated on the List of Charges\*). Any further years of storage will be charged at an annual rate, as detailed in the List of Charges

### Payment Options

- MFS accepts payment by cash, cheque, credit and debit cards(excluding American Express)
- credit card transactions incur a supplementary charge of 2% to cover charges levied by the processing bank. Card payments can be made at MFS or over the telephone
- MFS cannot offer finance or loan facilities to fund treatment
